I really like this game. It is a great platformer with very smooth controls. I have played through the game 3 times now, using an XBOX controller, and that works remarkably well.

The sound effects and music significantly add to the great atmosphere of the game. The visuals are simple but work out well: not too much detail so as to make it a bit more difficult to spot enemies. This game is certainly tough on speedrunners: if you are not careful you will die, over and over again, by running into a hidden enemy, because enemies change position from run to run so you can't simply memorize the optimal path through the map. This is an intentional feature, that adds to the difficulty, and should not be considered a flaw, as some players do!

Another critique some players have is the camera and the dark sides of the screen making it more difficult to look ahead and spot hidden enemies. This is also very much intentional. And I guess aiming using a mouse would actually be more difficult if the camera was always centered on the player. Again, players need to adjust to how the camera works in this game and be a bit more careful when you can't see far ahead. And when you hear the sounds of the scorpions but can't see them, just make sure you don't jump into an area that you can properly see. After a while you will learn how to spot the hidden ones, because they are seldomly completely hidden but usually expose a pixel or two that can be spotted if you pay attention. And by aiming in a certain direction you can force the camera to move a little in that direction.

What I also consider to be a great feature of this game is that players can adjust the difficulty of the game. Slower speed, unlimited lives, unlimited ammo, aim assistance, etc can be adjusted if the default difficulty is too much. That way you can gain experience and step by step adjust difficulty as you get better in taking out enemies and avoiding death traps.

After you have defeated all 5 bosses and taken out the "core", you get a final mini-game which is very different from the rest of the game and in my opinion is not necessary.. The outfits and customization items in this dlc are great for the specops side of it but the fallout side with the cloths isnt that great. You get a shirt and some other items but if your going to get this for the cloths then your really missing out. The weapons that come with this dlc are awesome and add the power that you need a in a fire fight. I have enjoyed using the weapons that come with this dlc. This is not a must have dlc, if you enjoy the base game and want to customize more in the game and get a few more weapons then this is a dlc to pick up. I suggest getting it at a discounted price. This is a good dlc but not great. The only thing that makes it good is the weapons that you get.. only played a few minutes and i already love this game, amazing soundtrack that matches up with the game, just the cubes don't sync up with their hitboxes for like half a second or something. Very colorful mind you, I don't recommend this game if you don't like too many colors at once.. Entertaining as heck. Kinda wish they made a moe and version of this game tho.

And where's my porn light?. Basically a Point and click game. Has a nice moody atmosphere, graphics and sound are nice enough, nothing amazing. I managed to finish the game once in about 45 minutes but there are multiple ways to end the game, so I'll be revisiting it for at least one more run. Puzzles aren't terribly taxing but require attentiveness. Overall just a nice little experience.

Not a bad series for the time the games were made! Nowadays with games being real linear, this particular series allows you to do and go where ever you want to. Definately worth a try!. Is this a good game? Don't know. Crashes during the tutorial.. I've played free phone auto runners that felt more fluid and fun than this piece of garbage.

Play bit trip runner instead if you're looking for an auto runner.. so this game seems like its a really fun game but how can people play when it does not let you on the server. sorry but why waste 3-4 hours trying to get the game to connect to the server when I can simple play a diffrent game. Great game, in family with good oldies as Gone Home and Everybody\u00b4s Gone To The Rapture. Here we are following some strange deaths that have occurred from the 1970\u00b4s and up to the 1990\u00b4s.

Sorry, nothing occult or spooky (just a bit) here, but an intriguing story in a little village, where you as a journalist are set to solve the deaths (do not die your self).

I spend about 9 hours completing the story/investigation - great and contributing hours!. The only super hero in this super hero game. Weak somewhat in the beginning but after you level her and get elite tech for her from the region missions(the map thingy on the ark end lair thing). She is a super hero. Put the elite tech on her weapon. Level her to 40 as well. My only complaint is the fruitbar haircut they gave her.. Great quality plane. A lot of fun to fly. Nicely detailed cockpit.. Fun game. Straight forward and easy to learn. Smooth controls, solid gameplay, and immersive atmosphere. Still needs some sound effects and music but haven't run into any bugs that break the game play.

Good work!. Couldn't figure out how to put bullets in a gun and had to bash a melonhead to death with it. its exactly like dead rising 2

same lines

same cutscenes

same story

you just play as frank west
