I've added 2 additional Parameters: @BookingType and @Activity. They should not be required and should be filled by the the data supplied by the user. When the page is loaded it always shows a select-box with all values (1-5) in the select-box, although the user is only selecting the value "bookingtype". The select-box will only appear when I press a button - the page reloads and the added 2 extra parameters are not filled. I can't seem to find what the problem is. Anyone that can help? Code for SqlDataSource: " SelectCommand="SELECT * FROM [Bookings] WHERE ([BookingID] = @BookingID) AND ([Activities] = @Activities)">

Download and install Microsoft Excel for Mac 2011 Download MS Excel File Properties Changer Open MS Excel for Mac 2011, open MS Excel File Properties Changer and click OK Microsoft Excel for Mac 2011 will display the tool with an option for saving the file Open the file and start modifying it according to the specifications, as required Close the software or save it as a new file as you see fit Related software downloads Review: Handy lists for Excel Handy lists for Excel is a handy and simple software application that provides you with the ability to generate lists for Excel spreadsheets. It can be used for many purposes, from general reports to organizing and securing PDF files. The software lets you work with almost everything you can do with Excel lists, such as input, output, and many customization options. Its interface is made of two panes, and the second one contains all the details and characteristics for the list that you're currently working on. How does it work? You can use the list to create notes, tasks, timelines, just to name a few options. You can also use it for plotting and working with drawings or diagrams. Although the software supports password protection, it doesn't let you keep the password in a list. A word of caution here: opening a list or a file in this software automatically sends it to the destination files, which means that you may lose sensitive information. The program offers several features, such as import/export or table and text editing. It can also send documents to different formats, such as HTML. Review: ImageKit Impress - Photo Slideshow Creator ImageKit Impress is a versatile and user-friendly software tool that allows users to create professional-quality slideshows from their digital photos. It makes it a snap to turn your photos into self-colored slideshows and movies. The program is intuitive and user-friendly and doesn't require any specific knowledge. Review: aEdio Multimedia Suite 3.7.0 aEdio Multimedia Suite 3.7.0 is an easy-to-use software solution for beginners who need to learn how to use iMovie to make a video from their camera, or for professionals who want to add professional effects and video in iMovie to increase the sales of their products.
