"Friendship... is not something you learn in school. But if you haven't learned the meaning of friendship, you really haven't learned anything."

I really like the "Get Read to Run" mode.. this is quite possibly the most underrated game on steam, Extremley alot of fun and alot better than speedrunners. This is wonderful party game. If you have up to 9 controllers to connect and a screen to sit around, having everyone race and punch each other to the finish lines has been hours of fun.

I can't speak to the single player but just the party game aspect has been worth it to me.. This is a fun multi-player online game. I remember first playing it at the Experiance Music Project in WA. I wish it was more popular so it would be easier to find other people to play with online.. Cannot believe I spent \$15 on what could be a Free To Play game.

I am disappointed. The game is quite unplayable. The control of the game that a player has is horrible.. I like it! I just wanted to give this game a good review because it deserves one.. I like it! I just wanted to give this game a good review because it deserves one.. More like boring game-bow

Honestly though, got old fast imo. Really fun with friends. It sucks that not many people own the game though, it's really underrated.. I was able to play the main multiplayer mode with 7 players and what can i say?

It was AWESOME!

I'm not really a big fan of the other game modes but I would still recommend this game for anyone who is creating a Party Game library. this is quite possibly the most underrated game on steam, Extremley alot of fun and alot better than speedrunners
